

ABSTRACT OF THE DISCLOSURE

A unit for quick connection of conductors to terminals has a body, at least two mechanical devices each formed and operative for a quick connection conductors to terminals, a body, at least two mechanical devices each formed and operative for a quick connection of one conductor to each terminal and for disconnection of the one conductor from each terminal, the mechanical devices being formed so that each of the mechanical devices provides a quick connection of one of the conductors to each of the terminal, and a disconnection of the one conductor from each terminal without impairing the other of the mechanical devices and thereby the other conductor.
